INSTRUMENTS

BE INSPIRED IN 2019 WITH THE SISK GEMOLOGY REFERENCE GUIDE

This fantastic three-volume set by Jewelry Television co-founder Jerry Sisk is a must for passionate gem collectors, amateur gemmologists and professionals alike.

With incredibly detailed information and impressive colour photography, the Sisk Gemology Reference Guide hones in on more than 100 gemstones, including diamond, emerald, ruby and sapphire, and assesses their observational, optical and physical properties. Other highlights include a selection of 'Noteworthy Gems', such as azurite, kyanite, prehnite and sphalerite, a focus on the ever-popular birthstones, and the visually striking 'Gallery of Gems' – a photographic compilation that will inspire even the most seasoned gemmologist.

Retail Price £165. Current Gem-A members and students receive a 5% discount on books.

If you require any further information, advice or simply wish to make a purchase (Product ID BKS0033) then please email instruments@gem-a.com ■
